2008 Land Use was updated from the 1999 Land Use files through orthophotography taken 11/13/2009 at a scale of 1 to 400. Initial data provided by the University of Massachusetts, Amherst and created from 1:10000 Color Infrared photos using the McConnell land use system. Due to the disparate photo resources the current wetlands may be understated.

Data developed by the Northern Middlesex Council of Governments.
